

LO-LOHM LATCHING 3-PORT HIGH DENSITY INTER- FACE (HDI) SOLENOID VALVE

The Lee Company continues to expand its High Density Interface (HDI) solenoid valve platform by combining the high flow capabilities of the Lo-Lohm design with the power savings of our Latching design, all within a compact footprint. After supplying only a momentary (10 ms minimum) voltage pulse, this magnetically-latched solenoid valve will hold its flow state until a follow-on momentary voltage pulse (with reverse polarity) is applied to switch its flow direction. Aside from the momentary pulse, no power is consumed while maintaining each flow state.

This ultra-low heat and low power 3-port valve is optimized for compact, battery powered instruments such as portable respiratory therapy devices, molecular diagnostic instruments, environmental gas samplers and other OEM flow switching devices where high flow capacity, low power and small size are critical.

The Lee Company offers an array of standard manifolds for testing as well as custom designed manifold configurations for production. Performance parameters can be optimized for a specific application. Contact your Lee Sales Engineer for additional technical assistance and application information.

- Magnetically Latched
- Ultra Low Power Consumption (as low as 28 mJ/switch)
- High Flow Capacity
- Reliable Bi-Stable Switching
- Compact Size
- Operating Pressure Range: Vac - 45 psig (0 - 15 psid)
- Light Weight: Less than 4.5 grams
- Leakage: Less than 50 μ LPM at 5 psid (air) throughout rated cycle life
- Cycle Life: 10 million cycles minimum
- Wetted Materials: Housing (PBT), Plunger Head (PPS), Armature/Stop (FeCr Alloy), Spring (316 SS), Seal (Silicone), Epoxy, O-rings on Plug-in Style Valves (FKM)

STYLE	PART NUMBER	VOLTAGE ¹ (Vdc)	LOHM RATE ² ON AIR AT 70°F (21°C)	POWER CONSUMPTION ³ AT 70°F (21°C) (mJ/switch)
Plug-In	LHLA0511355D	5	550 Lohms (14.6 SLPM at 15 psid; Ref. Cv = 0.036)	28
	LHLA1211355D	12		35
Face Mount	LHLA0521380D	5	800 Lohms (10 SLPM at 15 psid; Ref. Cv = 0.025)	28
	LHLA1221380D	12		35
Ported	LHLA0531380D	5		28
	LHLA1231380D	12		35

NOTES: (1) Other voltages available upon request
 (2) The Lohm is a measure of flow resistance. Additional information can be found at www.theleeco.com
 (3) Power consumption is calculated based on a 10 ms electrical pulse.

SWITCHING TABLE		
VALVE STATE	TERMINAL	POLARITY
CLOSED  INLET ↓ OPEN	1	+
	2	-
OPEN  INLET ↑ CLOSED	1	-
	2	+

The valve will switch to, and remain in the state indicated when a 10 to 30 ms electrical pulse is applied with the rated voltage and polarity.
