Subject: Compliance to REACH Regulations for The Lee Company Precision Microhydraulic Products

Reference: Initial EU directive 1907/2006

The Lee Company Precision Microhydraulic Products are considered articles and are not subject to REACH registration or pre-registration. Consequently, REACH Annex XVII and XIV, which require ECHA authorization of the substances found on the SVHC list, does not apply to The Lee Company

The Lee Company has conducted a REACH compliance investigation of our suppliers and materials. The Lee Company Precision Microhydraulic Products comply with the requirements of REACH as it relates to articles, and there are no known SVHC concentrations above 0.1% weight by weight (w/w). Compliance is as defined in Article 67 with reference to Annex XVII. Substances of Very High Concern (SVHC) that may be present are not intended to be released from our products under normal operating conditions, nor does the amount equal or exceed the one tonne per year reporting requirement.

This declaration does not apply to customer specified non-compliant components and processes.

Because of the possible changes in the laws and regulations, the aforementioned is based on REACH defined as the inclusions to the list of Substances of Very High Concern (SVHC) dated prior to the release date of this document.

Sincerely,
The Lee Company
